

Enriching Care for Gitxsan First Nations with Dementia through Culturally Relevant, Place-based Learning

Debbie Sullivan, Mavis Sebastian and David McAtackney

September 17th, 2019

BACKGROUND

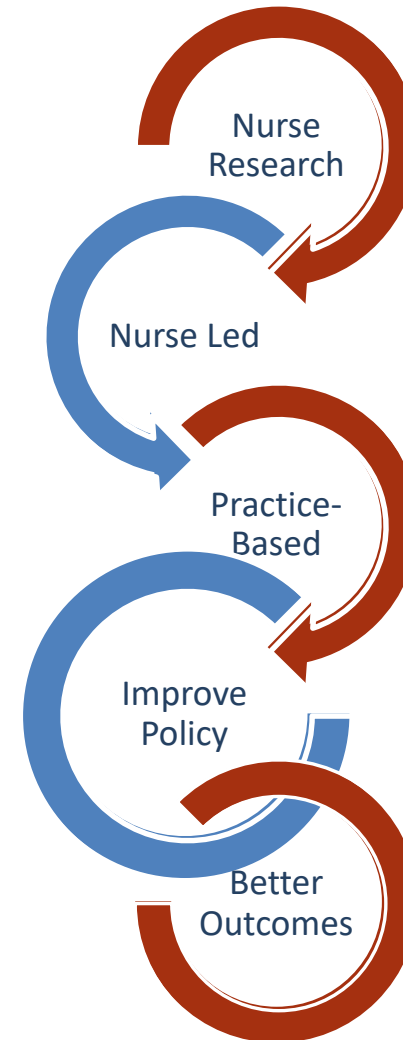

BCNRI – Practice-Based Nursing Program

Request for Applications

BC Nursing Research Initiative
Practice-based Nursing Research Program

Gitanyow, Gitwangak,
Gitanmaax, Kispiox,
Sik-e-dakh and Hagwilget

Objectives

- Recognize components of Indigenous Research methodology
- Describe some of the findings which could inform future research with Indigenous people
- Recognize the richness in including cultural learnings in your work

“We could change Elder Care for
the Gitxsan People through
Nursing Research and Education”

An innovative idea from the Gitxsan Health
Society’s Executive Health Director, Mary Knowles

How can culturally relevant, place-based learning for Nursing teams, families and community enrich the care for Gitxsan First Nations' Elders with Dementia?

PROJECT

Cultural Learning/Competency

Two-Eyed

Seeing

Gitxsan Health Society, 2017 - Hypothesis

Gathering knowledge

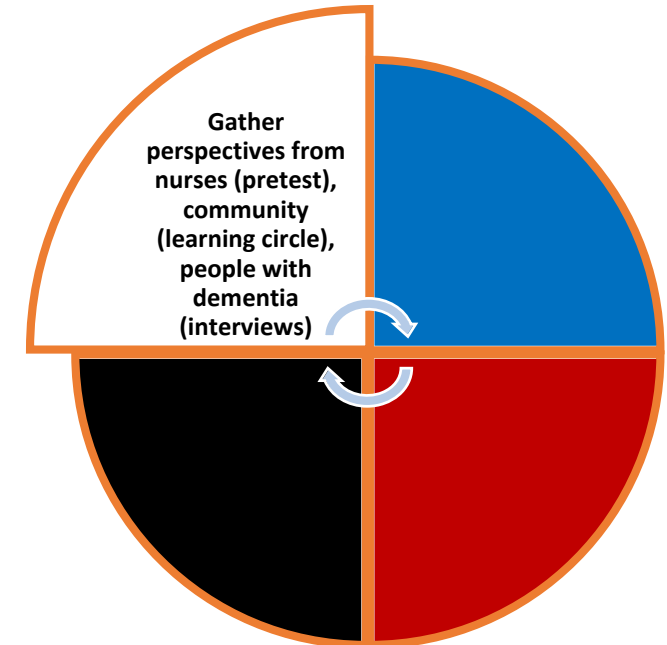

Nursing Pre and Post tests

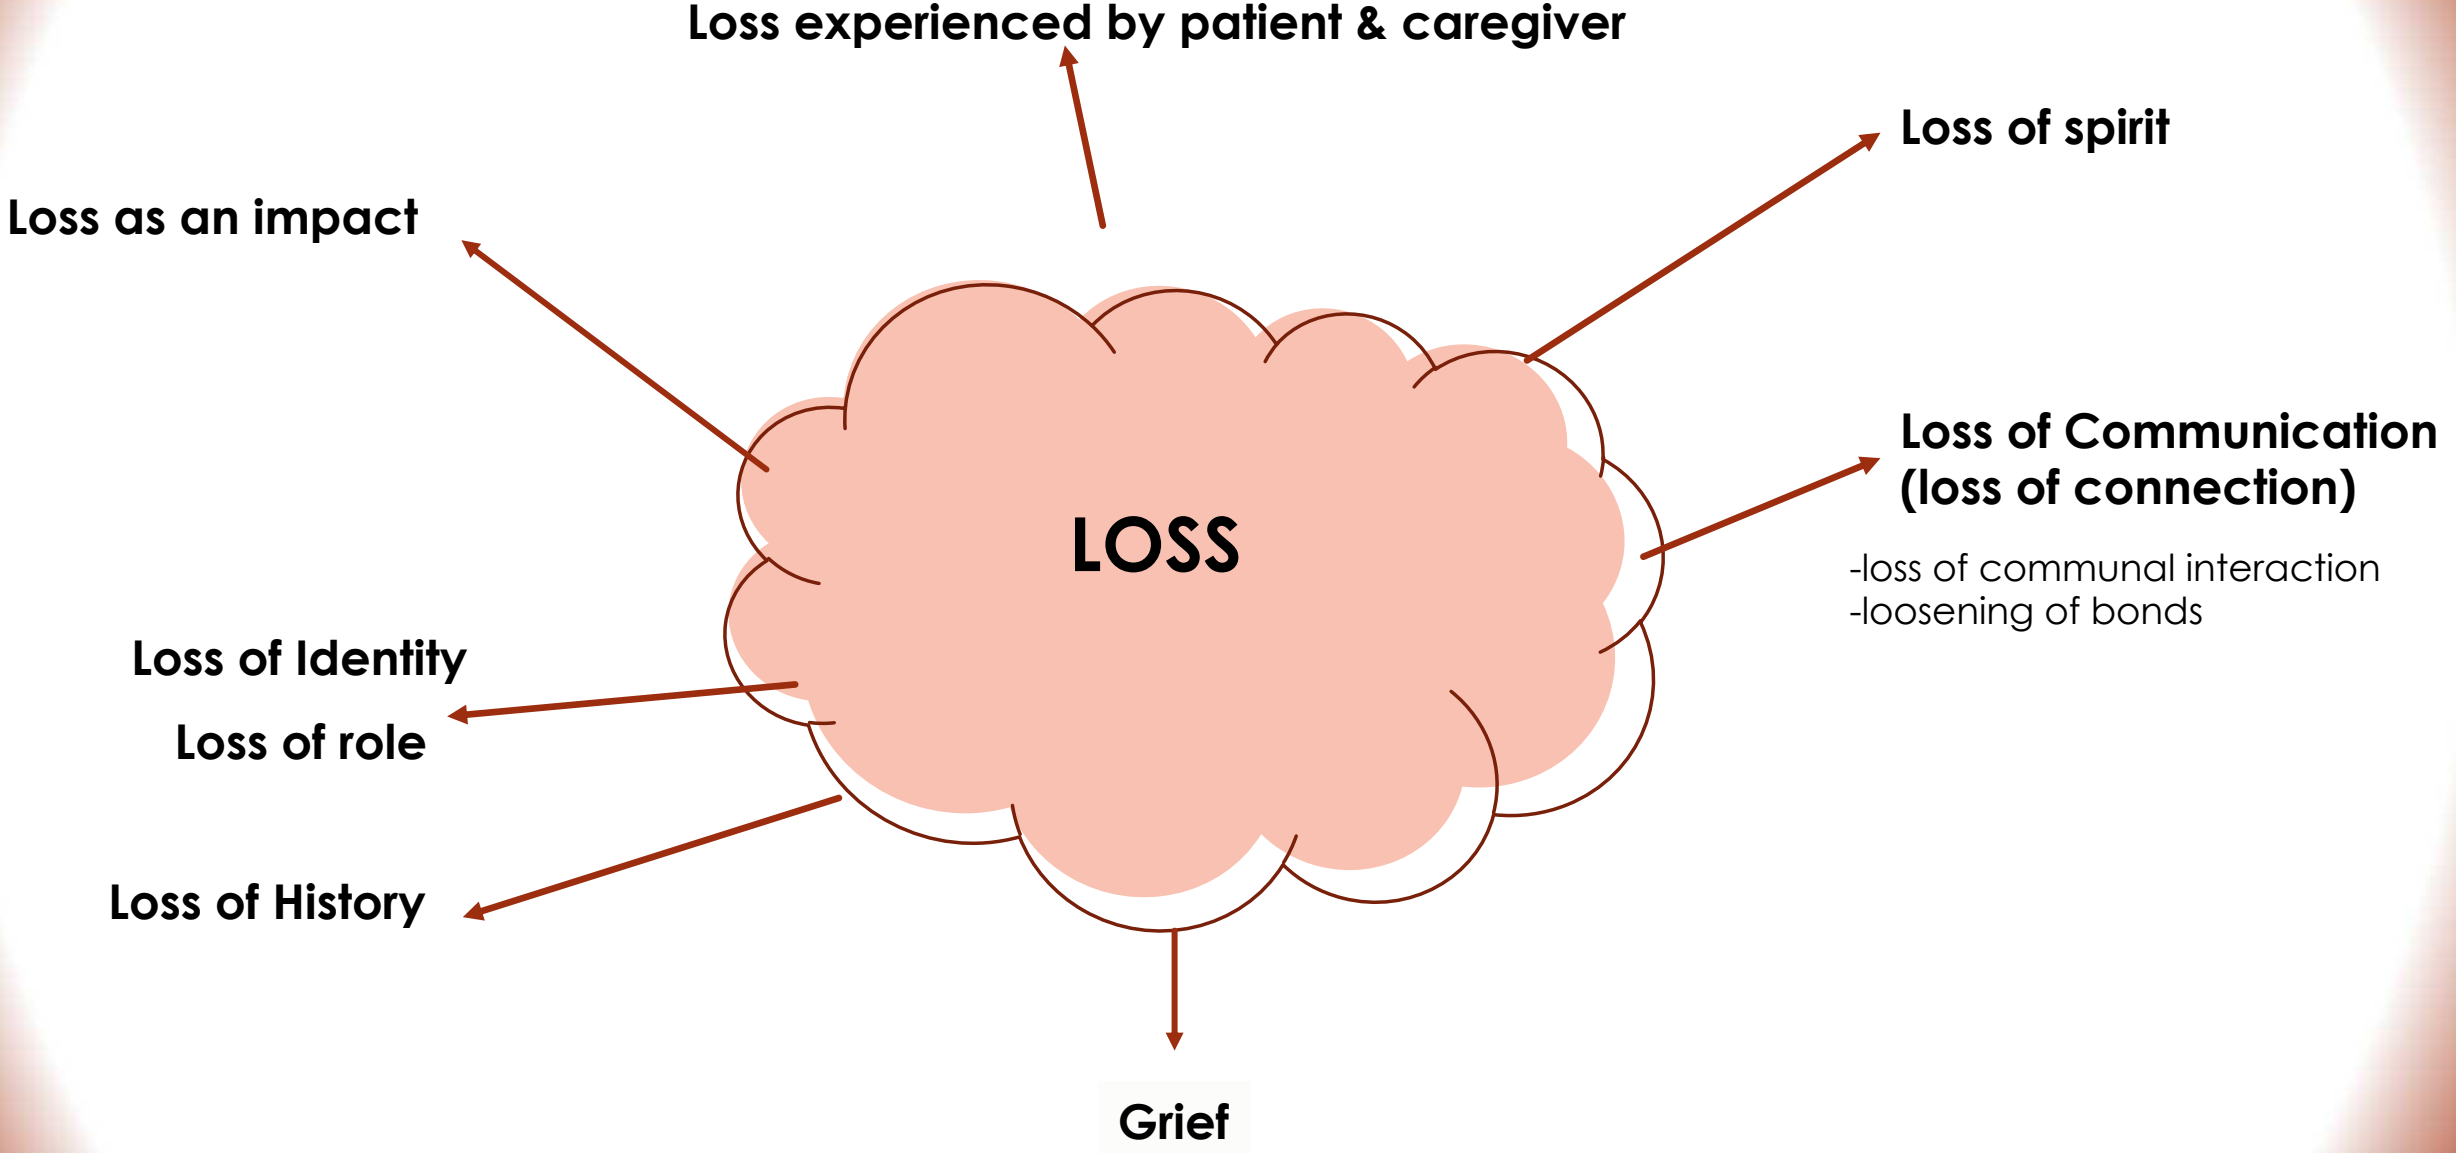

Interviews

Learning Circle

Relationship Needs

- Between Nurses/Elders
- Elders/Informal & Caregivers
- Between Nurses/Doctors
- Community/Family

Community Relationships

Communication Barriers

- Young Nurses
- Few Long Term Nurses
- Discrimination/Racism
- Familiarity: male/female roles & role in community

Relationality

Disconnection / Connection

- from family/friends
- from land/community

Family

Access to Networks

- other caregivers, other families
- In the community

Community-Based/ Accessible

- A place within the community
- For support
- People there who can listen to you

Access & Connection

Access to Support for Caregivers

- Education
- Support
- Networking Opportunities

Access to Information & Creating Connections

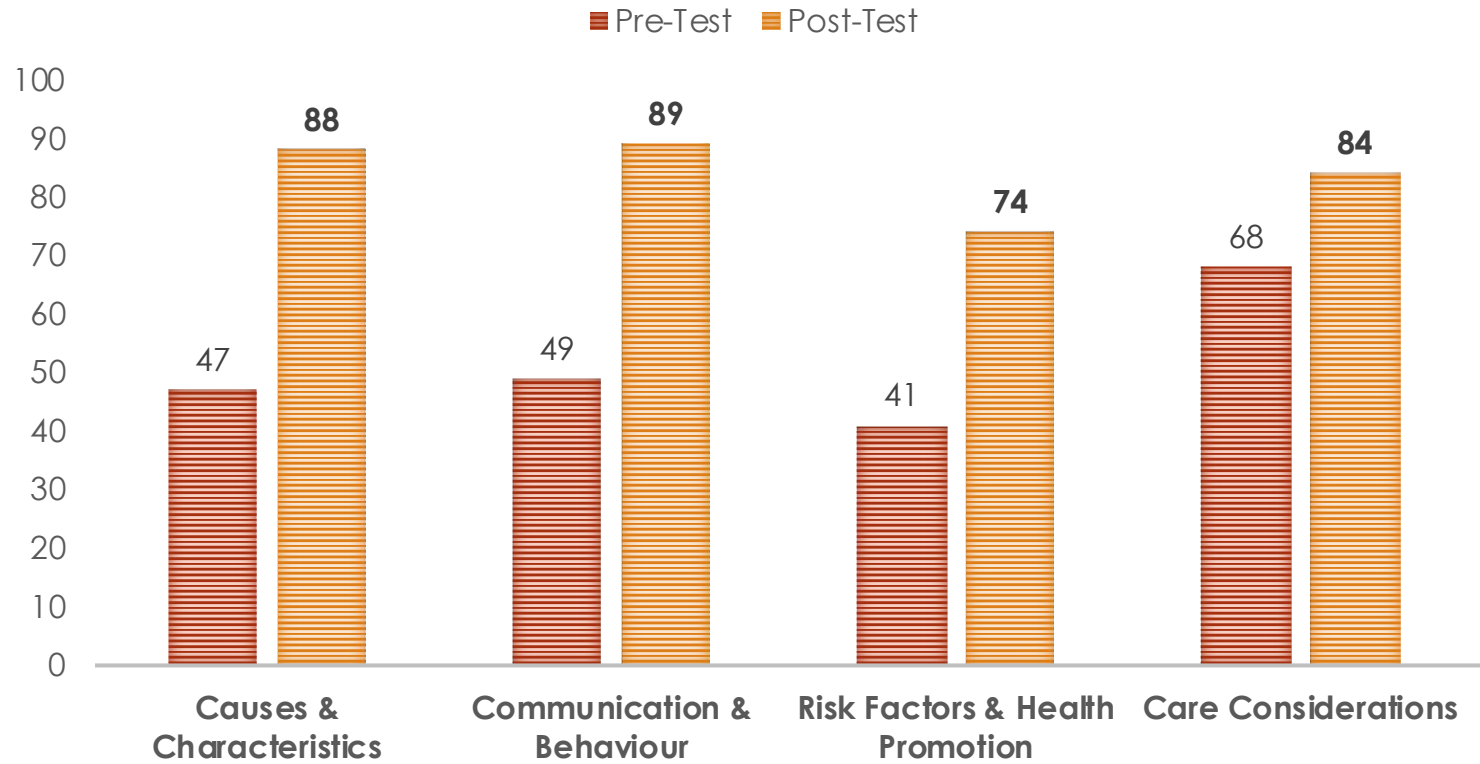

- Newsletters
- Networks

Nurse Education Workshop

Nurse Education

PRE AND POST TEST RESULTS

Evaluation

“I really got a lot out of it and I really look forward to having the talking circles more often.”

What is OCAP[®] ?

- Set of standards that establish how First Nations data should be collected, protected, used, or shared. They are the *de facto* standard for how to conduct research with First Nations
- Standing for ownership, control, access and possession
- OCAP[®] asserts that First Nations have control over data collection processes in their communities, and that they own and control how this information can be used

CONCLUSION

Next Steps

- ***Creating a video***
“Gitxsan way of knowing about dementia”
- ***Fact Sheets:***
<https://www.i-caare.ca/>
- ***MSFHR Report***
- ***Nurses advocating for support groups***

Indigenous Research Methodology

- Our Key Strategies:
 - Driven by community identified needs
 - Authentic intention, decolonized thinking and grounded in community, language and history
 - Engaging knowledge holders
 - Using talking circles
 - Returning the findings first to the community
 - Seeking feedback from the community about *their* findings
